PROFESSIONAL SUMMARY

Data analyst with 3+ years of experience in operational data analysis, root-cause analysis, and dashboarding. Turns operational and web data into KPI reporting and clear recommendations for stakeholders, including analytics behind a 175% sales increase.

TECHNICAL SKILLS

- Data Analysis & BI: SQL, Power BI, DAX, Excel (Power Query), Google Analytics, Microsoft Clarity, A/B testing
- Languages & Frameworks: Python (Pandas), Apache Spark, Kafka, Hive, HDFS
- Cloud & Databases: AWS (S3, Glue, Athena), GCP, PostgreSQL, ETL pipeline design
- Soft skills: stakeholder reporting, root-cause analysis, training and onboarding, cross-functional communication

WORK EXPERIENCE

Operations Analyst, Amazon, Canada *Jun 2025 – Present*

- Selected as 1 of 24 associates out of 600+ to pilot Canada's first fully robotics-integrated sort center
- Monitored real-time performance of 1,000 robotic drive units, 40 induct stations (20 manual, 20 automated), and conveyor systems across an automated sort center, maintaining **98.5%+** throughput accuracy against SLA targets
- Managed operational data in Excel and SQL, investigating trends and exceptions and escalating findings to leads
- Documented SOPs and trained incoming associates, reducing onboarding ramp-up time across new intake cycles

Full-Stack Developer, Snapper Future Tech, India *Mar 2020 – Mar 2023*

Ed-tech and software company; owned web analytics and Power BI reporting alongside full-stack development

- Built Power BI dashboards tracking course sales, student retention and drop-off, cart abandonment, traffic sources, and ad performance; presented weekly to leadership to surface friction points
- Analyzed retention and drop-off by course to pinpoint hard-to-follow sections, improving course flow and lifting completion by **27%**
- Used dashboard analytics to identify price objections as the primary driver of **cart abandonment** and lost sales, then helped launch a 3-step checkout that let students judge course quality before buying, driving a 175% increase in sales
- Built 3 production websites serving ~10,000 daily hits and 400 active users, using Google Analytics and Microsoft Clarity to track conversion funnels, driving a **25% lift** in conversion

PROJECTS

Recap: Event Photo Sharing Platform *(React, TypeScript, Supabase, Redis)* *Dec 2025 – Present*

- Built a PWA with QR-based event access and Redis caching for sub-100ms interactions

Stock Sentiment Analysis Pipeline *(Python, OpenAI API, Kafka, Hive, Spark, GCP)* *Sep 2024 – Dec 2024*

- Built a Kafka, Hive, HDFS, and Spark pipeline on GCP to process news headline data, queried with SQL
- Built Power BI dashboards correlating headline sentiment with stock price movement across **12,000+ headlines** and all NASDAQ and S&P 500 tickers

Retail Analytics Engine *(Apache Spark, Pandas, Power BI)* *Jun 2024 – Aug 2024*

- Built a Spark and Pandas engine that processes raw transaction logs into clean, real-time sales and inventory metrics
- Built Power BI dashboards showing sales trends and inventory levels by product to support stocking decisions

EDUCATION

Correlation One, Remote, Canada *Jul 2026 – Expected Nov 2026*

Amazon Data Center Technician Training Program (Amazon Career Choice)
Coursework: Linux, networking, AWS compute and networking, server hardware, power and cooling, cybersecurity

Conestoga College, Waterloo, Canada *May 2023 – Dec 2024*

Post-Graduate Certificate, Computer Applications Development (GPA 3.89)
Post-Graduate Certificate, Big Data Solutions Architecture (GPA 3.81)

Savitribai Phule Pune University, India *Mar 2017 – Apr 2020*

Bachelor of Business Administration
